"Drown Me"

Visit "[Drown Me](#)" on MotoLyrics.com

I should know but I don't
How the all of us go on
When we're at each other's throats
Nobody wants to say goodbye

CHORUS:

Fly me to a point of view
I've been mistaking all of you
Take me to another state of mind
Fly me to a point of view
Where I can stand myself again
Fly me
Drown me

And I know you'll find your way
Like you have those times before
And the rain will clear the way
To another open door
Once more

REPEAT CHORUS
