Was just about to leave the part  
When this super hot thing came on up to me  
He said, "I really think that you should come with me  
There's something, something that you have to see"

He said, "Don't worry,  
I'll just lock the door  
Close your eyes and count to ten"  
And one, two, three, four

Oh oh, I just made out with your boyfriend  
That's right, but we only did it one time  
Oh oh, I didn't know he was your boyfriend  
That's right, and that'll be the last time  
I make out with your boyfriend

You can have him back  
You can have him back, back, back

So the night after the party  
He calls and tells me that he wants me, wants me  
And then he tells me that he's never felt this way  
I told him "Boy, you better stay away"

Should've had him begging for more  
It was unbelievable  
One, two, three, four

Oh oh, I just made out with your boyfriend  
That's right, but we only did it one time  
Oh oh, I didn't know he was your boyfriend  
That's right, and that'll be the last time

Oh oh, I just made out with your boyfriend  
That's right, but we only did it one time  
Oh oh, I didn't know he was your boyfriend  
That's right, and that'll be the last time  
I make out with your boyfriend

I, I, I just made out with your boyfriend  
I, I, I just made out with your boyfriend  
I, I, I just made out with your boyfriend

I, I, I just made out with your boyfriend

You can have him back  
You can have him back, back, back  
You can have him back  
I never wanted that

You can have him back  
You can have him back, back, back  
You can have him back  
I never wanted that

Oh oh, I just made out with your boyfriend  
That's right, but we only did it one time  
Oh oh, I didn't know he was your boyfriend  
That's right, and that'll be the last time

Oh oh, I just made out with your boyfriend  
That's right, but we only did it one time  
Oh oh, I didn't know he was your boyfriend  
That's right, and that'll be the last time

(You can have him back  
You can have him back, back, back)

I make out with your boyfriend

(You can have him back  
You can have him back, back, back)

Yeah
