Fucking whore, you left me  
There's no one else to betray  
These scars in my heart you gave me as a present  
Let me know what pain means

I buried my love to you and also your meaningless words:  
"I'll always love you. I'll never leave you."

But now I let you know what pain means  
Feel my revenge you stupid fucking bitch

Call your family, your source of love  
They're dead, so pray to them next to god  
I'll also take your life  
Like you cut my heart with a knife  
I just look in your beautiful eyes  
Behind you an endless sea of tears

Count...  
There's only one bullet left

But I'm alive so I'll split your head with a crowbar  
And eat what's coming out of it  
I'll take out your eyes and let you see yourself dying  
I'll see your fucking face rotting  
Eaten by a thousand diseased rats  
I'll lick your lips and give you eternal sleep

Rot
