

Felony "Cyberspace"

Visit "[Cyberspace](#)" on MotoLyrics.com

Present time decays so fast It's tomorrow we're
heading for
No one thinks about the past No place for misery and
war
Technology's evolution grows Uncertain power is yet to
come
Mankinds future no one knows All human values seem
to be gone

Welcome to cyberspace - No request for a feeling
The birth of another race - Progress the only meaning
at all

I'm mourning for all the children Had they ever a real
life

The sign of warning will not be seen The future
threatens us like a knife
I fear the approach of the unknown Just listen to the
news every day
No turning back the cancer's grown In the end there's a
high price to pay

Present time decays so fast Uncertain power is yet to
come
Nobody thinking about the past All human values seem
to be gone
