Tonight I'm yours completely sharing you with pain  
Guilt and remorse come with me  
They're dying to play  
Take me down with you  
This feels so far from perfect  
I'll try and pretend this is my heart  
Be careful it's so hard to mend  
I'm down for whatever if you're down  
For the same take me take me take me anywhere you  
wanna go  
She'll never know  
Take me take me tell me everything that I wanna know  
Then I'll let you go down  
With you I can't go on pretending  
You don't know her name  
We've gone too far to turn back now  
I might as well stay if you're down for whatever  
I'm down for the same  
Take me take me take me anywhere you wanna go  
She'll never know  
Take me take me tell me everything that I wanna know  
Lemme go I think I'll wait too long  
Wanna know  
Let me go  
Just take me down with you  
Take me take me take me down with you  
Take me take me take me down with you  
Take me take me take me down with you

I play guitar and I'm better than you  
My name is james james  
He comes from houston and so do we too  
His name is james james  
Woah woah woah  
He's got something to say james james
