Well you think I'll be lonely you think I'll be blue  
Well you think that I'll worry worry over you well I will  
yes I will  
Well you think that I'll miss you miss you night and day  
You think I will walk the streets while you're away yes I  
will you know I will  
I'm not a bitty shame to say that you're the one I love  
From now until eternity I swear by stars above  
Well you think I'll try to get you back try with all my  
might  
You think I'll keep on crying when you're not in sight  
well I will yes I will  
[ ac.guitar ]  
I'm not a bitty shame to say that you're the one I love

From now until eternity I swear by stars above  
Well you think I'll always be the way I've always been  
You think that if you'll ask me to I'll come back again  
yes I will you know I will
