You cast the spell on me the first time we met  
Be wished and enchanted at first glance  
Hypnotized by your command let you get the upper  
hand now I'm living in a trance  
Living in a trance in a world of lost romance I never had  
a chance living in a trance  
Captured by your charms living just for you  
I was happy in our make believe romance  
I never knew then the spell you had me in now I'm living  
in a trance

Living in a trance in a world of lost romance I never had  
a chance living in a trance
