Yes our love is the true and lasting kind  
I walk the line because you make me want to  
Because you're mine there's a lot of things that I don't  
do

It makes me proud to tell the world you're mine  
Yes our love is the true and lasting kind  
I've searched for ways to tell you that I love you  
And make you know that no one stands above you  
It's the thought of you that gets me home on time  
Yes our love is the true and lasting kind  
It scares me sometimes when I stop to wonder

What would I do without you by my side  
I could never fill the space you leave behind yes our  
love is the true and lasting kind  
Yes our love is the true and lasting kind
