(Who's next to be who's next to me to be the first on  
your list)  
I was the first one to hold you in my arms  
I was the first one to capture all your charms  
I was the first one to ever make you fall  
You were playin' a game with my love to shame and I  
wasn't the first one at all  
So who's next to take my place who's next to share your  
embrace  
Who's next to kiss your lips  
Who's next to be who's next to me to be the first on  
your list  
[ guitar ]  
The people they told me what you would put me  
through  
But I wouldn't listen I thought your love was true

Now I know better it's plain for me to see  
After you took my heart and broke it apart you really  
didn't love me  
So who's next to take my place...  
Who's next to take my place...  
Who's next to take my place...
