

Bo Burnham "New Math"

Visit "[New Math](#)" on MotoLyrics.com

Oh yes... im banging one tonight.

oh hi that was someone...reliable.

1,2,3,4
Lets Do It

What's a pirate minus the ship? just a creative
homeless guy,

And an anteater plus a large hungry mutant ant? an
ironic way to die.

And what's domain, domain, range (xxy) a kid with too
much in his pants.

And two balls minus one, six titles at the tour de
France. The tour de Frace.

Cancer.

Split a decision with long division,
Take the circumference of your circumcision
Live like your data and when you're all set
Put it all together and whatever you get.

It's new math... it's new math.

What's a bag of chips divided by five,well that's a
Nike worker's meal,

And Santa clause multiplied by I well I guess that
makes him real,

And the square root of the NBA is Africa in a box,
How do you trace a scatter plot? You give the pencil to
Michael j fox.

Take the approximate moral proportion of the probable
problem of a pro-life abortion.

Live like your data, and when you're all set

Put it all together and whatever you get...

Is new math. its new.

And if you took a factor tree of the factors that
caused my girl to leave me you'd have a tree...
Full of Asian porn.

C-A-L-C-U-LATOR (see you later) mathematical minds
make
industrial smog.

And what's the opposite of $\ln x$, duraflame the
unnatural
log.

that is clever right?
Support the farmers with a pro-tractor (pro tractor,
Link Kennedy and Lincoln with a common factor (fact
or)

Live like your data and when your all set put it all
together and whatever you get.

it's new. it's new. it's new it's new it's new math.

Word problems...Ready?

If there's a fat guy in a pastry shop with a twenty
dollar bill and he's ready to buy,
In order to predict his volume change you need to know
the value of pi (pie)
And there's a metal train that a mile long and at the
very back end a lightning bolt struck her,
How long til it reaches and kills the driver, provided
that he's a good conductor,
And if ten percent of men are gay and twenty percent
of
men are Chinese, what are the odds that a man chosen
at
random spends his free time and mealtime while on
his
knees?

And if Kim is half as old as Bobby who is two years
older than twelve year old Tori,

For how many more 30 day months will their
threesomes
be considered statutory rape

whoo...ahhh cause math can be sexy.

Cause havin sex is like quadratic expansion if it can't
be split then it's time to stop,
And havin sex is like doing fractions, it's improper
for the larger one to be on top, yeah

And havin sex is like math homework, I do it best when
I'm alone in my bed.
And squarin numbers are just like women, if they're
under thirteen just do them in your head

and new math...

pedaphilia....
