January where'd you go
You were my savior, barred deep in the sense
It's not the here anymore,
Since you been gone days are so long
I find you opened my eyes

I remember a time upon the silvery lights
We floated to a new dimension
You and I get so high, appears right through the sky
On board on marshmallow spaceship

January please come home
It's no fun without you
Lucy said, she thought she heard your voice calling
outside once
In the cold winds as they go on
Maybe it's your ghost
Somewhere in the distance

I remember a time upon the silvery lights
We floated to a new dimension
You and I get so high, appears right through the sky
On board on marshmallow spaceship

I can still see the lights and the comets rush by
Just like it was yesterday
After all of this time, baby you still on my mind
Even though the snow is melting, ... melting

I remember a time, above the silvery lights
Yes we float, we float, we floated
You and I get so high, appears right through the sky
On board on marshmallow spaceship
You and I
You and I, yes we float

I remember a time upon the silvery lights
We floated to a new dimension
You and I get so high, appears right through the sky
On board on marshmallow spaceship
