[Verse 1:]

A Severed lie
A lover's high
No will to fight
So lay your gun down here
Just kiss me sweet
And hold me tight
There's only I
Can get me out of this (me out of this)

Black velvet
Feels warm on my skin
Touch me slowly
Wanna saviour my freedom

[Chorus :]

How could I know I'd love for this?
I lied for love in the name of peace
How could I know I'd come to this?

How could I know I'd dream for this?
How could I know I'd die for this?
Lay down your gun come run with me...

So kiss me slowly
Kiss me quick
Alone and safe
An empty street
Stop the games
Surrender soon
In front of false
May make it through
Before the lights
Come blind my skin
I wanna feel
This love I'm in

Guilty pleasure
My desire
I'll hold you to
My line of fire

[Verse 2:]

So kiss me sweet
And kiss me slow
Til I get high
No plans to let this go (plans to let **** go)
What could I say?
What would you do?
Tempation got the better of you too

Black velvet
Feels warm on my skin
Kiss me slowly
Wanna saviour this moment with you

[Chorus :]

How could I know I'd love for this?
I lied for love in the name of peace
How could I know I'd come to this?

How could I know I'd dream for this?
How could I know I'd die for this?
Lay down your gun come run with me...

So kiss kiss kiss kiss kiss kiss kiss me tonight
Your love tastes sweet makes me feel everything's
alright
So kiss kiss kiss kiss kiss kiss kiss me tonight
Your love tastes sweet makes me feel everything's
alright
