It's so good to see you when you're back on the scene
I look for you all day, you know what I mean.
But when the sun goes down
From this moment you always come around
You perfume the air,
Your black dress is always there.

Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
Lady night

You look so fine this evening lady night
Your clothes in high fashion, your hair combed just
right.
And when you pass me by
My blood pressure begins to rise so high,
I begin to sweat
Oh I've never kissed you night.

Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
Lady night

And what are you going to do before you leave
Look at all of the fellows what you love indeed.
To see you in the day
I'm sure there's no price to great to pay
You stay out of sight
You'll never return 'till night

Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
Oh my lady lady lady lady lady night
