"Move it"

Visit "[Move it](#)" on MotoLyrics.com

Move it and move it and move it and move it
Move it and move it all
Move it and move it and move it and move it
Move it and move it keep you movin' for me
Shake your body.

Shake your body, baby shake your body
shake your body, shake it just for me
Shake your body, baby shake your body
shake your body, shake it just for me.

Circle with your hip's and
dance into the zone
keep your body move and
till it's out of control
Move yor body
no, no, no, don't stop it now.

Move it and move it and move it and move it
move it and move it your body next to me
Move it and move it and move it and move it
Move it and move it keep you movin' for me
Shake you body.

Shake your body, baby shake your body
shake your body, shake it just for me
Shake your body, baby shake your body
shake your body, you're my energy.

Tonight will be the nigh
so let the fire burn
I'll like the way you move
and you had me when you turn
Move yor body
no, no, no, don't stop it now.

Move it and move it and move it and move it
move it and move it your body next to me
move it and move it and move it and move it
and move it and move it all.

Move it and move it and move it and move it
move it and move it your body next to me
Shake your body
move it all, move it all, move it all.

When the night has fallen
then ticking clock's will sound
Make your body move like
it's our last night in town.

Shake your body, baby shake your body
shake your body, shake it just for me
Shake your body, baby shake your body
shake your body, you're my energy.

Circle with your hip's and
dance into the zone
keep your body move and
till it's out of control
Move yor body
no, no, no, don't stop it now.

Move it and move it and move it and move it
move it and move your body next to me
Move it and move it and move it and move it
move it and move your body next to me.

Move it and move it and move it and move it
move it and move your body next to me
Move it and move it and move it and move it
move it and move your body next to me
Shake your body.
