This coming holiday,
What will be left to say,

There's times when I can't see in the mirror,
There's times when I can't see at all,
Cause you're 2, 000 miles away,
I'll be waiting for the day,
Where you can be next to me,
Will it last forever?

This coming holiday,
What will be left to say,
Your love should lead the way,
So I can't forget about,
I won't forget about,
You.

I loved to do you right,
I knew that this was goodbye,
Your blues in the summer sky,
Now I can't forget about,
Won't forget about,
You,

Some days I miss you so much that it hurts,
But there's always time for us to make it work,
You are the endless air I breathe,
My one and only if I was lucky,
What can I do to notice you,
Absolutely nothing,

This coming holiday,
What will be left to say,
Your love should lead the way,
So I can't forget about,
I won't forget about,
You.

I loved to do you right,
I knew that this was goodbye,
Your blues in the summer sky,
Now I can't forget about,
Won't forget about,
You,

So we burn into the small town under neon lights,
The late nights in Orinda were forever until you went
away,
OOH girl,
You know I wish you could stay,

[Small Breakdown]

This coming holiday,
What will be left to say,
Your love should lead the way,
So I can't forget about,
I won't forget about,
You.

This coming holiday,
What will be left to say,
Your love should lead the way,
So I can't forget about,
I won't forget about,
You.

I loved to do you right,
I knew that this was goodbye,
Your blues in the summer sky,
Now I can't forget about,
Won't forget about,
You.
