

Fightstar **"28K Resolution"**

Visit "[28K Resolution](#)" on MotoLyrics.com

I think I just fell in love with you
I think I just fell in love with you
No no just don't be afraid of what they think
I'm teaching you well
Just say it's true enough
Please say it's good enough

We are holding on to dying stars
We are moving so fast
So come on come on it's always the start of a new year
We only need to promise ourselves to keep our
resolutions

I think I just found another home
I think I just found another life
No no just don't be afraid to breath this air
Just open your eyes
And you will see it all
I know you'll see it all

We are holding on to dying stars
We are moving so fast
So come on come on it's always the start of a new year
We only need to promise ourselves to keep our
resolutions

Right hands on
We will promise brand new resolutions
Right hands on
We will promise brand new starts

We are holding on to dying stars
We are moving so fast
So come on come on it's always the start of a new year
We only need to promise ourselves to keep our
resolutions
