

Figure Four

"International Space Station Ii"

Visit "[International Space Station Ii](#)" on MotoLyrics.com

Do you remember the day we left the Earth?
I thought it was for good

It's been two years since then I think
At the time we thought we should

But I miss the blues, I'll miss the greens
I liked humans more than machines

Our families are so far away
As we floated around in space

But even though we miss our friends
The love we share will never end

Internation space station
Join your arms across our nations
The time has come to return to Earth
But we must back our things first

Don't cry
We'll be back soon
From up so high
Beyond the moon
