Visit "[You Make Things Right](#)" on MotoLyrics.com

So lonely, on that night: In the corner, of my eye
There you stood, in the dark: I felt it, in my heart
As i looked, in the crowd: You smile, it stood out
I want it, i need it: You better, believe it

That i'm all right
When your by my side
You make things right
You make things right

You stayed in-side my head: At the shows, in my bed
With your lips, im in love: Cause your kiss, is my drug
I want you, so dearly: Im down here, on my knees
Well grow old, together: In my arms, forever

That i'm all right
When your by my side
You make things right
You make things right

Now im aware, of what's been done
Appreciate for what's to come
Inspire me, with a brand new soul
Live for the futures the way to go
