Cloud my eyes and tell me what to see  
I'm falling  
Every way I turn the same disease  
But I like it

Brace myself and hit the wall with ease  
I'm colliding, I'm not minding the pain

I've been down here before  
All my bones and joints are sore  
Dig my way out of the wreck again

I've been down here before  
Lost myself and so much more  
Find my way out of the game again

Open up my head and take it in  
Just like always  
Think about the bar and take a swing  
Loaded trapeze

What you need the most from me is yours  
I'll continue to deceive you, my friend

I've been down here before  
All my bones and joints are sore  
Dig my way out of the wreck again

I've been down here before  
Lost myself and so much more  
Find my way out of the game again

You lost what made you you  
Or maybe I never knew  
I can't stay here anymore  
Give it all or you're on your own

I will leave you  
I will leave you  
I will leave you  
I will leave you

I've been down here before  
All my bones and joints are sore  
Dig my way out of the wreck again

I've been down here before  
Lost myself and so much more  
Find my way out of the game again

I've been down here before  
All my bones and joints are sore  
Dig my way out of the wreck again

I've been down here before  
Lost myself and so much more  
Find my way out of the game again
