

Fingertips "To Escape"

Visit "[To Escape](#)" on MotoLyrics.com

A shockwave's lying in the city moan
Sadness here and it has control
Don't look behind and take the chance to escape...

Shockwave is your way to be free
Shockwave, get ready to be
Shockwave, just hear me

If you know what i'm feeling now
You'll see i'm strange somehow...

A shockwave came to open up your eyes
You're feeling down there's no big surprise
What if you try to scream louder as you can
Show me you're a man...

...to escape...
