Skip to it, skip to it, skip to it

You must be the girl
I read about in fairy tales
Then slowly you appeared
Inside my reality
How I'd love to be the man
Who shares your nights
Like Cinderella at the ball
Just one dance, instant romance

[*]
Skip to my Lou, my girl
I'm comin' after you (Skip to it, skip to it)
Let's pretend I have the shoe
That fits you perfectly

[**]
Skip to my Lou, my darling
I'm comin' for you
I wanna be your knight in shining armor
Skip to my Lou, my darling
I'm waiting for you
With the kiss that I'm sure will waken you

[***]
Skip to my Lou, my darling
I'm comin' for you
I wanna be your knight in shining armor
Skip to my Lou, my darling
I'm waiting for you
I would change my world around
If you want me to

There must be a clue
As to why I'm so attracted to you
It's not what you say
It's what you do to me
You have got me in a way
... as if to say
My name is Romeo, baby
Could you be my Juliet

(* Repeat)

Skip to my Lou, my girl
I'm comin' after you (Skip to it, skip to it)
Let's pretend I have the shoe
That fits you perfectly

(** Repeat 2 times)

Skip to my Lou, my darling
I'm comin' for you
I wanna be your knight in shining armor
Skip to my Lou, my darling
I'm waiting for you
With the kiss that I'm sure will waken you

[****]

Skip to it, skip to it, skip to it
Darlin', my darlin'
Skip to it, skip to it, skip to it
Darlin', my darlin'
Skip to it, skip to it, skip to it
Darlin', my darlin'

Skip to it, skip to it, skip to it

(** Repeat)

Skip to my Lou, my darling
I'm comin' for you
I wanna be your knight in shining armor
Skip to my Lou, my darling
I'm waiting for you
With the kiss that I'm sure will waken you

(*** Repeat)

Skip to my Lou, my darling
I'm comin' for you
I wanna be your knight in shining armor
Skip to my Lou, my darling
I'm waiting for you
I would change my world around
If you want me to

(**** Repeat and fade)

Skip to it, skip to it, skip to it
Darlin', my darlin'
Skip to it, skip to it, skip to it
Darlin', my darlin'
Skip to it, skip to it, skip to it
Darlin', my darlin'
