Lets go climb up on the roof
In the twilight 360 degree view
As we lie down
Watch the fading light turn into stars
There you are
Secret god
Breathe my name
Secret god stir up the dust
Whisper my name
This reminds me of another place
Lonesome wolf comes down from the hills
And hes walking in circles howling at the moon
In another life he will be enchanted by a woman Secret
god stir up the dust
Breathe my name
Secret god stir up the dust
Whisper my name
I see a man collapse
In the doorway of a restaurant
And Im holding my hand out
The first one there to help him up
Secret god stir up the dust
Whisper my name
Secret god stir up the dust
Breathe my name
Time at hand stir up the dust
Breathe my name
Secret god whisper my name
