### "Astral Fornication"

Astral bodies are shimmering, the stars are  
glimmering  
Flying souls of evil forces, roaming between galaxies  
We sit on you when you fall asleep  
To take your soul into the deep  
We drink your life-force to strengthen ourselves  
When you wake up you'll feel nothing else:  
Than fear and weakness, you'll be depressed!  
Pain and sickness, therapies will be useless!  
All kind of medicine are ineffective remedies  
There's no weapon against our malefic force  
We shall come back with the nightfall!  
We're living in the deep space, doing astral fornication  
Walking between the stars, doing cosmic devastation!  
We're living in the deep space, doing astral fornication  
Against the sleeping human mind, doing cosmic  
execution!  
If you think, life is just a stupid carnival  
You deserve to be frightened by the Evil!
