From beyond galaxies  
Eerie constellations  
A secret sign  
Travelled through space and time

I picked up my shield  
And took up my body armour  
For victory I'll lead  
My raging army of the fire

Commander of the forces  
Off deepest black divine  
Magic from beyond the stars  
Deadly light shall shine

I call forth rotten corpses,  
Forgotten spirits, wrathful ghosts  
To strengthen our forces  
For the war of souls

We shall destroy and demolish  
Everything that existed  
Everything you once held dear  
Behold our magic

With my blood I'll carve the spells  
Forgotten runes of higher wisdom  
Watch the words light up in flames  
The ruinous spell got back it's freedom

Behold our arrival!  
The sky shall be burning  
By the living dark fire  
The greatest myth of magic

... magic  
... magic
