The Dark by Firehouse

You know the whole world is changing and it's moving  
so fast

That today's innovations never seem to last

You're just a digital slave with an email address

Too much information only means more stress

Welcome to the computer age

You've got to have every machine that we make

Stronger faster new and improved if you want to  
compete

(check it out)

'Till the next vest thing makes you obsolete

Stay up to speed with technology or you will be left in  
the dark

You better be afraid if you can't keep up it'll be too late

And you will be left in the dark

They can always page you or call you on your cellular  
phone

There's no way you can hide the won't leave you alone

Cd-rom to Dvd, vinyl Lp to mp3

Welcome to the computer age

You've got to have every machine that we make

Stronger faster new and improved if you want to

compete

(check it out)

'Till the next best thing makes you obsolete

Stay up to speed with technology or you will be left in  
the dark

You better be afraid if you can't if you can't keep up it'll  
be too late

And you will be left in the dark
