

Firevision "Everything After"

Visit "[Everything After](#)" on MotoLyrics.com

Slipped away to the open
Watched the shadows deface the ground
Till the day we all
Believe that we might lose control

Will the moment we fear
Turn to everything clear

After you're gone
Away from the life
Of the planet you're on
And everything after

Faded awake
Somebody spoke
When I left here today
And everything after [2x]

It pulls us back into orbit
When disorder surrounds this place
And it brings us down
We can't keep our feet on the ground

Until the moment we fear
Turns to everything clear

[Repeat Chorus]

We are down here
We are Space
