Father, you helped us to build it right  
Intruder, you destroyed the land's pride  
Hunger, can't you see it in our eyes  
Disaster all over

Brother, let's go through bad times  
Someday, we gonna see a light above  
Anger, it's a passion in their mind  
Unsecured all over

The land of eternity  
Is beneath the sky  
The land of eternity  
You will never die  
The land of eternity  
Now begins to cry

A disgrace on you!  
Our wounded hearts will never ever heal!

Mother, please tell us what to do  
An angel, guiding us to the root  
Sister, we gotta save our love and  
Now pray for the children our future

We did follow the rules, we were not blind  
They ranked us as, third world  
These coins, aren't forever  
And hearts without mankind  
The wars will never end
