We took a photo in a photobooth, we looked quite pretty
on the pictures that came out. Member I was smilin' for our future kids, so they would think there mum and dad were happy all the time but we were not. They thought we were dancing all around in love! Thought we were always havin' fun, laughing all the time. We were not!

She took a photo of him (in a restaurant). They looked quite bored until she picked up the camera. Then they were kissing, yelling, hugging funny things for the colorprints so that somebody else could say: Hey! Look! They are always havin' fun - they are in love! They are dancing 'round and 'round, laughing all the time in Love!

I can say that we were troubled. That some faces are double. I can say that them and us were troubled. That them and them and them and them are double. Dancing all around, in love! Always havin' fun, aaahh Dancing 'round and 'round in love! Always havin' fun in front of the cam. In front of the cam.
