Another day is over
Another light is breaking and i'm tired
But i im wild about you my little woman
I feel you in the water
I feel you in the corner of myself
Hey who else babe knows you like i do?
As we go again with the stars and their friends
Loving me come'on
As i hold on to you for all we've been thru
Promises (promises) are just a part of it (are just a part
of it)
Comon
For every sweet surrender another spark is woke by the
sun
No other one can shine like you do for me
I know i can be trying but every day is something to
love
And i love every time i look at you
As we go again 'round the stars and their friends
Loving me come'on
As i hold on to you for all we've been thru
Promises (promises) are just a part of it (are just a part
of it)
Promises (promises) are just the start of it (are just the
start of it)
Promises (promises) are just a part of it (are just a part
of it)
Promises (promises) are just the start of it (are just the
start of it)
Promises (promises) are just a part of it (are just a part
of it)
(fade out)
