Woh oh oh oh  
Woh oh  
Brand new world

Don't strike the light  
You're setting on me  
Every time I turn around  
Your shadow here  
(As I) reach for the telephone  
Your voice appears  
Echoes in my mind  
And I just can't see

So burn out the cold  
And set me free  
Every time I fight it off  
I just see you and me

CHORUS 1:  
But you're only trying to make it hard  
(Brand new world) uh uh  
There's a brand new world  
But you don't know how to face it  
Looking just to find a better start  
To take it  
You've seen me  
But I don't stand with, I don't stand with you

You turn to cold  
As I say goodbye  
The only words that meant a thing was just out of fear  
I watch you go  
As I stood right there  
I wanted so to give you love  
But you just weren't here

So burn out the cold  
And set me free  
There's a brand new world out there  
For both of us to see (woh oh oh oh)

CHORUS 2:

But you're only trying to make it hard  
(you know you're only trying)  
(you know you're only trying to make it up)  
Baby (Brand new world)  
There's a brand new world  
But you don't know how to face it  
Looking just to find a better start  
To take it (brand new world)  
Using me, uh  
But I don't stay with you  
But you're only trying to make it hard  
(woh oh oh oh, woh oh)  
Baby (brand new world)  
There's a brand new world  
But you don't know how to face it  
(you know you're only trying)  
Looking just to find a better start  
To take it (brand new world)  
Using me, uh  
But I don't stay with you  
I don't stay with you

Oh, come on

So burn out the cold  
Set me free  
There's a brand new world out there  
For both of us to see  
Uh uh

REPEAT CHORUS
