"Treat Me Like A Lady"

Visit "[Treat Me Like A Lady](#)" on MotoLyrics.com

Uh, woh
Yeah, if you treat me right
I'll be yours tonight, uh
Ah yeah, mmm
Hey, listen

Feelings of mine don't matter
As long as you are around, I feel good (I feel good)
Don't let on about this love thing, uh
We can make it right
I can make you feel

Secrets I tell you, keep them
Don't tell another
I feel I can trust you
Don't let me down
You know it
Ain't too polite
To cheat on a lady

If your word ain't no good (if your word
ain't no good)
Then I'll find another (then I'll find another)
To treat me
The way you should, alright (yeah)
For me there's no other (for me there's no
other)
I'll guarantee you that (I'll guarantee you that)
A good love is hard to find, uh

CHORUS:

So treat me like a lady (lady)
Like you know you should
Try to (understand) understand
How I feel for you
Just treat me like a lady (lady)
I show my love for you
Can't you (understand) understand
That my love is true

Believe me

Loving you comes so easy
As long as I have you near
I can watch you (I can watch you)
Don't play around
With my heart
Don't get me wrong
But I see your move

Dealing me wrong, don't ever
You know the outcome
I'll just up and leave you, mmm mmm
If you let me down (if you let me down)
You'll know it
I won't be around
To pick up the pieces

If your word ain't no good (if you're word
ain't no good)
Then I'll find another (then I'll find another)
To treat me
The way you should, alright (alright)
For me there's no other (for me there's no
other)
I'll guarantee you that (I'll guarantee you that)
A good love is hard to find, uh

Repeat chorus

Come on, woh
Come on, come on, come on, come on, come on now
Come on now, yeah
Woh

Treat me like a lady like you know you should
Got to understand how I feel for you
Just treat me like a lady, show me what you got, uh
I'll be your lady right until I
See your move, deal me wrong, don't you ever
I can watch you baby
I can make you feel (ah yeah)
So treat me like a lady, I'll show you the deal

Repeat chorus (ad-lib) to fade
