Baby, come inside you'll never know what you might
find
Maybe you'll find that there are better days if you leave
these days behind
So baby take my hand
And let me show you, let me show you

That I love the way you love the way I love you
And I love the way you love me, too
And I love the way we take away each other
Into places that erase away our thoughts, our cares,
our dreams or scares
And I never want to let you go
Because I love the way you are

So baby, you live and learn, you crash and burn, and
c'est la vie
But it's crazy to me, you'll never see, you'll never see
what you mean to me
So baby take my hand
And let me show you, let me show you

That I love the way you love the way I love you
And I love the way you love me too
And I love the way we take away each other
Into places that erase away our thoughts, our cares,
our dreams or scares
And I never want to let you go
Because I love the way you are
You know I love the way you are

So baby, baby

Baby, come inside you'll never know what you might
find
And maybe you'll find that there are better days
If you leave these days behind
So baby take my hand
And let me show you, let me show you
