Verse 1

Hear me now, if anyone is out there,
I'm asking for your help
You better make me proud, I'm expecting you to be
there
When I fall down

I'm still here, but hard to find
Everything seems so clear, I wish that you were by my
side
Every single day and night, it's the story of my life
I'm the only one who knows how hard I try

Pre chorus

To be yours, you can be mine,
But all you say is so long, and goodbye
Those words you speak make me believe
That this could only be true
In a dream...

Chorus

Let us watch, let us wait
Can you help me, can you save the day
Help me I've fallen, Help me I'm lost
Can you help me, cuz I have fallen
Save the day, watch me fall
Help me say what I've known to be right all along
If only you could've seen
Exactly what they saw

Verse 2

Fate has run out, and I'm not about to believe in hope
Cuz hope will just let me down
Just like everyone else who said they would be there
I guess that you just don't care,
Cuz I need them right now

Now I cry, if I ever needed you help
You would leave me there to die

In the sickening cold dark night, I know you wouldn't be
there

I now know that you don't care,
The suspense would just eat me alive

Pre chorus

Cuz I want to be yours, you can be mine,
But all you say is so long, and goodbye
Those words you speak make me believe
That this could only be true
In a dream...

Chorus

Let us watch, let us wait
Can you help me, can you save the day
Help me I've fallen, Help me I'm lost
Can you help me, cuz I have fallen
Save the day, watch me fall
Help me say what I've known to be right all along
If only you could've seen
Exactly what they saw

Pre chorus

Cuz I want to be yours, you can be mine,
But all you say is so long, and goodbye
Those words you speak make me believe
That this could only be true
In a dream...

Chorus

Let us watch, let us wait
Can you help me, can you save the day
Help me I've fallen, Help me I'm lost
Can you help me, cuz I have fallen
Save the day, watch me fall
Help me say what I've known to be right all along
If only you could've seen
Exactly what they saw
