

## Flaming Lips

### "Just Above Love"

Visit "[Just Above Love](#)" on MotoLyrics.com

There is something just above love  
And that's what she hears, and that's where she is

I don't know how people  
Arrive at themselves

Sometimes you can hear them trying  
They're trying for something a little bit harder

It's high and they're already high  
It's high, it's higher than they are

It's high, and they're already high  
It's high, and it's higher than they are

But they're going for something that's just above love  
And that's where she is, and that's where she lives

There is something just above love  
And that's what she hears, and that's what she hears  
And that's where she lives, and that's where she is  
And that's where she is
