Had the chance to make it this time
And I could not believe,
All that you saw in me
I would have left it all... without you
Without your faith in me,
I just could never be,
What I want and live for now...

Chorus

With you here,
I've lost the fear
Of bliss and hell, don't let me down
I see so clear

The chance came back and still you stood by
Fucked it up once again,

Fearing this was the end
I wish id always known... what I know now
This is all that I need,
I see it in all my dreams
But I need to make it real somehow...

Chorus

Rise or fall
A life so small
I let it out, and broke it down
I faced it all

Now it's me standing here
Free from all of the fear
And now it's my time to show
So just go
