Tell me what u really wanna say
When you see me turn and walk away
And now its rising up inside
Can you feel it now, can you feel itÂ...
I don't feel the sameÂ...
Does it justify the end?
When all you needed was a friend,
And now it's coming up inside,
Can you feel it, now, can you feel itÂ...

Chorus

I don't mindÂ... when you feel so hollow and you try to
follow,

(You wanna cry... when this feeling comes up and you
wanna,)

Let it dieÂ... let it die

Looking for the one to take your side,
You think everything you say is rightÂ... you need it
Still you can not break this chain,
As you try to lay the blame,
And now it's rising up again,
Can you feel it
