Music and lyrics by Stevie Nicks

We see no change in sight
Watching her decline
She gets on a midnight plane
She's done it a thousand times

When love starts out in the darkness
It doesn't do well in the light
Affairs of the heart
Start out in the dark
Usually stay with the night

I know you don't agree
(everyday you tell me)
I know you don't agree

I know he loves me
Everyday he calls me
He says he adores me
What can I say

You can't love him
You can't have him
I do have him, most of the time

Anywhere we can
Anytime we can
Get away... get away

Maybe it's just something else
That you can't tell me
Maybe it's in the way that you
Look away from me

It's not like any words
Need to be said
Well you always know when something's wrong
My friend

I know you don't agree

(everyday you tell me)
I know you don't agree

I know he loves me
Everyday he calls me
He says he adores me
What can I say

We see no change in sight..
Watching her decline..
She gets on a midnight plane
She's done it a thousand times

When love starts out in the darkness
It doesn't do well in the light
Affairs of the heart
Start out in the dark
Usually stay with the night

When nobody sees them
At least, not together
She rarely goes out
She spends every day
Waiting for the day

When everybody finds out
Don't you know.... don't you know...
