Everybodys got your name on their lips  
Everybody sees something in your smile  
I don't know whats happened  
To this heart inside  
I know cos I've seen it in your smile

Everybody wants to hurt you  
Everybody wants to put you down  
Me i read you like tha pages of a book  
Just one look  
Was all it took

Do you know where your going to  
Is that really what you wanna do  
Only luck can love promise now  
You know love like this will never fail

Everybody wants to understand you  
Everybody wants to hold you in their arms

Well shes thrown away the key now  
And locked the door  
I don't think she'll come out anymore

Well I know what im gonna do  
Gonna send mt time loving you  
And if we run out of money we still got time  
And yeah love like this would be so fine

Everybodys got your name on their lips  
Everybody sees something in your smile  
I don't know whats happened  
To this heart inside  
I know cos I've seen it in your smile  
Yeah I know cos I've seen it in your smile  
Yeah I know because I've seen it in your smile
