They are very dangerous creatures,  
They ruin and damage our systems,  
They stick to our organs with suckers  
And sit there in darkness

They thankfully lay their eggs  
When we welcome them to our house  
They have no ass only mouth  
They have only suckers not legs

And they devour us from within  
They can live even in lungs  
They can make dirty everything what is clean  
They have no seniority or rungs

They make us bleed  
They make us suffer  
They swarming - adult or kid  
And they can't growl just muffle

And this is awfully  
When in absolute silence  
You feel their swarming  
Can we call it a violence?

And all who eats and who bleeds  
Can be attacked by helminthes!
