Tonight my eyes
Are satellites
I'll find your eyes
Through waves & signs
You are just like a star floating up in the sky
You could travel so far & never notice a light
Has burned out

(Chorus)
Everytime that you leave
You come right back to me
Can't you see you are my echo baby?
I wont ask you to stay
I think it's better this way
Can't you see you are my echo baby?

In dreams I'll fly
Above you tonight
Why can't I find your star in the sky?
I am just like the moon
Looking down on your life
I've traveled so far
Only to realize
You've burned out
& I'll say can't you see that I'm not well
'Cause if you can if you can tell
Know this time you might never come back
But I wont wait for you anyway

(Chorus)

Come on & turn on your lights
Fixating focus tonight
Come on & turn on your lights
For tonight
For tonight

(Chorus)

Why can't I find you?
