True love never dies
True love never dies

We move like shadows in the streetlight
Only me and you
A secret rendezvous
After midnight

They try to keep us from each other
They crucify our love
Say we're not good enough
To be lovers

I want to hold you in the morning
(I want to hold you)
I want to wake up by your side
With no reason to hide
What we're feeling
(Give me your feeling)

I want to tell the world about it
Tell them all the truth
Get up on the rooftop
And shout it

Our love will last forever
True love
True love never dies
We'll always be together
True love

Our love will last forever
True love
True love never dies
We'll always be together
True love

True love never dies
True love never dies
True love never dies
True love never dies

We move like shadows in the streetlight
Only me and you
A secret rendezvous
After midnight

They try to keep us from each other
They crucify our love
Say we're not good enough
To be lovers

Our love will last forever
True love
True love never dies
We'll always be together
True love

Our love will last forever
True love
True love never dies
We'll always be together
True love

Our love will last forever
True love
True love never dies
We'll always be together
True love
