"Learn To Live"

Visit "[Learn To Live](#)" on MotoLyrics.com

It's not exactly how you play or what you choose
Win or lose it's just a game
And it's a name is destitute
Still that challenge flies at your face
It is your faith and the human race
The whole condition is common place
No time to die, no time to waste

Now you learn
And live
And try just don't die

For it is hard to do something
That is real
And different
And new in this world today

So if you choose to change
Be different not the same
It's not how hard you tried
Just the fact you did
So there is no blame
Challenges keep flying at your face
Your part of the human race
Wipe that past from your face
Now stand up straight

And learn
And live
And try just don't die

For it's hard to do something
That is real
And new
And different in this world today
