This time
I know it's gonna be for real
This time
I know it's gonna be for real

Full stand still
I miss the chemistry of your kiss

This time
I know it's gonna be for real
Full stand still

This time
I know it's gonna be for real
Full stand still
I miss the chemistry of your kiss

This time
I know it's gonna be for real

Full stand still
Alone
And it's for real

Oh full stand still
Alone
And it's for real

I feel so totally happy, and it's all so real
I could surf the earth on a banana peel
I'm so totally into this
The chemistry of your kiss

The way you lose yourself at night
The way you look in the morning light
You're so pretty
Makes me wanna burn this city down

I walk the streets with a frown
The size of a playground merry-go-round
This time (this time)

I know it's gonna be for real

You are Miss World
I miss
The chemistry of your kiss

Full stand still
Alone
And it's for real

Ah full stand still
This time
I know it's gonna be for real

Full stand still
Alone
And it's for real

I feel so totally happy, and it's all so real
I could surf the earth on a banana peel
I'm so totally into this
The chemistry of your kiss

The way you lose yourself at night
The way you look in the morning light
You're so pretty
Makes me wanna burn this city down

I walk the streets with a frown
The size of a playground merry-go-round
This time (this time)
I know it's gonna be for real

You are Miss World
I miss
The chemistry of your kiss
Alone...
The chemistry of your kiss

You are Miss World
I miss
The chemistry of your kiss
