## "Bleak"

Visit "[Bleak](#)" on [MotoLyrics.com](http://MotoLyrics.com)

What you got now What you got now What you got now  
What you got now  
What you got now What you got now What you got now  
What you got now  
Whose in here hiding from the world  
Whose out there confused and alone

One more day I feel like this  
One step closer to finding your (?)

Long way down (What you got now What you got now  
What you got now What you got now)  
Long way down (What you got now What you got now  
What you got now What you got now)  
Long way down (What you got now What you got now  
What you got now What you got now)  
Long way

Can't speak it's too bleak for other's my dear  
So bleak can't speak for others my dear

Who's in here asleep wasting time  
Who's out there afraid to feel

Long way down (What you got now What you got now  
What you got now What you got now)  
Long way down (What you got now What you got now  
What you got now What you got now)  
Long way down (What you got now What you got now  
What you got now What you got now)  
Long way

So bleak can't speak for others my dear  
Can't speak too bleak my dear

Can't speak for others my dear  
So bleak can't speak for others my dear

So bleak to the world  
So bleak to your world

So now I'm starting to see it all fall down

I know others wait (?)  
Long way down (What you got now What you got now  
What you got now What you got now)  
Long way down (What you got now What you got now  
What you got now What you got now)  
Long way down (What you got now What you got now  
What you got now What you got now)  
Long way  
Can't speak it's too bleak for other's my dear  
So bleak can't speak for others not here  
Can't speak it's too bleak for other's my dear  
So bleak can't speak for others my dear

(What you got now What you got now What you got now  
What you got now) My dear  
(What you got now What you got now What you got now  
What you got now) My dear  
(What you got now What you got now What you got now  
What you got now) My dear  
(What you got now What you got now What you got now  
What you got now) My dear  
So bleak to your  
So bleak to your
