She know how to work a room
her lies, masked by her perfume
she's got you
I can't refuse her sweet nothings
her kiss much like a bee sting
she's got you

It's getting worst , you can hardly stand
seeing her, romancing the bland
inside it's eating you away, it's eating you away
she will lie as she did to you
once before , before saying she's through
then move onto another prey

inside you keep it buckled in

from afar caught watching her again
she's got you
for chance you'd get to speak your mind
expose and make her life untwine
yeah she's got you

It's getting worst , you can hardly stand
seeing her, romancing the bland
inside it's eating you away, it's eating you away
she will lie as she did to you
once before , before saying she's through
then move onto another prey
