3:09

neglected

the apathy begins at birth

the absolute destruction of one's self worth

when father comes home, the closet becomes a refuge

and the drinking

increases the abuse

this life-style of mindlessness must end before this

madness receives

acceptance

bruised arms and legs fill the bodies of young children

who do nothing but

hide innocently

in attempt to avoid their insanity

stop, stop, stop the abuse

this life-style of mindlessness must end before this

madness becomes

accepted
