Listen to me, baby  
I'll tell you what I need

Oh, come on and spend some time with me  
Oh, come on, one night is all I need, hey hey  
Give me satisfaction when you're steady to roll  
Give me what you got and you can give me more  
Come on, that's how it's gotta be

I need somebody, save your loving for me  
I need somebody, save your loving for me

Oh, come on, show me the games you play  
Rock on until the break of day, hey hey  
Let me come on over, spend some time with you  
I know a lot of things that we can do  
Come on, don't give it all away

I need somebody, save your loving for me  
I need somebody, save your loving for me

You're my all day study, you're my midnight dream  
You need love, I need love, rock me baby, 'til I scream

I need somebody, save your loving for me  
I need somebody, save your loving for me  
I need somebody, save your sweet love for me  
I need somebody, save your loving for me

I need, I need your sweet loving  
Come on, oh, come on, come on, baby, yeah  
Give me some of your sweet, sweet loving
