Submitter's comments:Â

This track has no official name. It is found after 3 minutes of silence after the final track on "As jy met vuur speel sal brand" (depending on your pressing, it's either "Tygerberg vliegtuig" or "Fokofpolisiekar"). It is framed by two Afrikaners (a man and a woman) discussing backward masking, and parts of the man's monologue are laid over the solo part (from 0:28 to 0:32) and over the beginning of track (when played backwards, the man can be heard discussing it). I would put the monologues in, but my Afrikaans is not good enough to transcribe the monologues.
