Say what you're gonna say and do what you're gonna do

I can't believe what's got into you

The day is long and the night is quick

They're dying young, the poor, the rich

I am poor, I am poor, I am poor

Say what you're gonna say and do what you're gonna do

I can't believe what's got into you

The day is long and the night is quick

They're dying young, the poor, the rich

Blood from a stone, blood from a stone, blood from a stone

Stone, stone, stone

Something special, something nice

Something pretty will suffice

Something simple, something right

Something special, something, life

Say what you're gonna say and do what you're gonna do

I can't believe what's got into you

The day is long and the night is quick

They're dying young, the poor, the rich

Long live the king, long live the king, long live the king

King, king, king

Something special, something nice

Something pretty shall suffice

Something simple, something right

Something special, something, life

I love you (x5)
