

Forever Moon "Analyze"

Visit "[Analyze](#)" on MotoLyrics.com

Almost 10 years gone by
Where did we go wrong
Wishes made on distant stars
Oh God it's been so long

I don't need you she cried
Or often said she tried
Holding out her hands
In front of her tonight

I never thought I'd be that far behind
I never thought that you could be so blind

CHORUS:

And you'll always be the same
I guess some things will never change
Time still remains for you to analyze

Misunderstanding, standing here tonight
It's not the kind you like to be looking in the eye

I can't be afraid to cry, I can't be afraid to try
I can't keep holding out when he's still alive

I never thought I'd be that far behind
I never thought that you could be so blind

CHORUS:

When tomorrow sees today
And every hour washed away
You know you're just another diamond in disguise

And you'll always be the same
I guess some things will never change
Time still remains for you to analyze
